

FACE MASK: A COMMON WEAPON TO COMBAT COVID-19

WHAT IS A FACE MASK?

Face masks are one tool utilized for preventing the spread of disease. Face masks are loose-fitting masks that cover the nose and mouth, and have ear loops or ties or bands at the back of the head.

NECESSITY OF FACE MASK

Facemasks help limit the spread of germs. When someone talks, coughs, or sneezes they may release tiny drops into the air that can infect others. Masks are a simple barrier to help prevent respiratory droplets from traveling into the air and onto other people when the person wearing the mask coughs, sneezes, talks, or raises their voice. Respiratory droplets spread the virus that causes COVID-19, masks reduce the spray of droplets when worn over the nose and mouth.

No mask on your face
Prevents spreading your germs
all over the place.

Masks are required at ALL times

Cover the nose and mouth all of time

HOME MADE MASK: SOME INITIATIVES

MASKS CAN BE MADE AT HOME VERY EASILY

MASK UP TASKS

Participants

Concept and Execution: Dr. Rituparna Ghosh, Assistant Professor and Head, Department of Geography, Raniganj Girls' College

Student participants:

Saraswati Rakshit-6th semester honours
Raya Dey-6th semester honours
Gargi Dutta- 4th semester honours
Antara Chattoraj-4th semester honours
Susmita Tewary-4th semester honours
Ankita Maji-4th semester honours
Srijala Das-4th semester honours
Rinku Mondal-4th semester honours
Suman Jaiwari-4th semester honours
Sangita Dubey-4th semester honours
Aditi Mondal-4th semester honours
Pragati Dey -Ex student of the department
Sudipta Mondal-Ex student of the department
Tanushree Maji-Ex student of the department
Rupali Sarkar-Ex student of the department
Somdipta Banerjee-Ex student of the department
