

RANIGANG GIRL'S COLLEGE

ENVIRONMENT STUDIES  
PROJECT

HINDI HONOURS 1st SEMESTER  
UNIVERSITY REGISTRATION NO-

113211210029 YEAR-2022

NAME: NISHA PASWAN

# **Raniganj Girls' College**

**Course Name: Environment Studies**

**Course Code: AEE101**

**Topic of the project:** Air pollution in my locality

## **A Project Report**

**Submitted by Semester-I students (Academic Year 2021-22)**

<b>Name of the student</b>	<b>Registration Number</b>
INDRANI AKHULI	KNU113211210148
SANSKRITI PANDIT	KNU113211210015
AMBIKA KUMARI SHARMA	KNU113211210202
SHAYMA KHATUN	KNU113211210055
KHUSHI KUMARI	KNU113211210016
ISHIKA SINGH	KNU113211210277
KUMARI ANJALI SHAW	KNU113211210025

DIBYA KOIRI	KNU113211110173
MUSKAN KHATUN	KNU113211110167
KANCHAN KUMARI NONIA	KNU113211210010
NISHA PASWAN	KNU113211210029
RITA SHAW	KNU113211210257
SHAMPA MAJI	KNU113211210114
ASHAPURNA GHOSH	KNU113211210134
SWETA PASI	KNU113211210273
ANJALI YADAV	KNU113211210002

## **CERTIFICATE**

This is to certify that this project titled “Air pollution in my locality” submitted by the students for the award of degree of B.A. Honours/ Program is a bonafide record of work carried out under my guidance and supervision.

<b>Name of the student</b>	<b>Registration Number</b>
INDRANI AKHULI	KNU113211210148
SANSKRITI PANDIT	KNU113211210015

# DATA TABLE OF AIR POLLUTION IN OUR LOCALITY

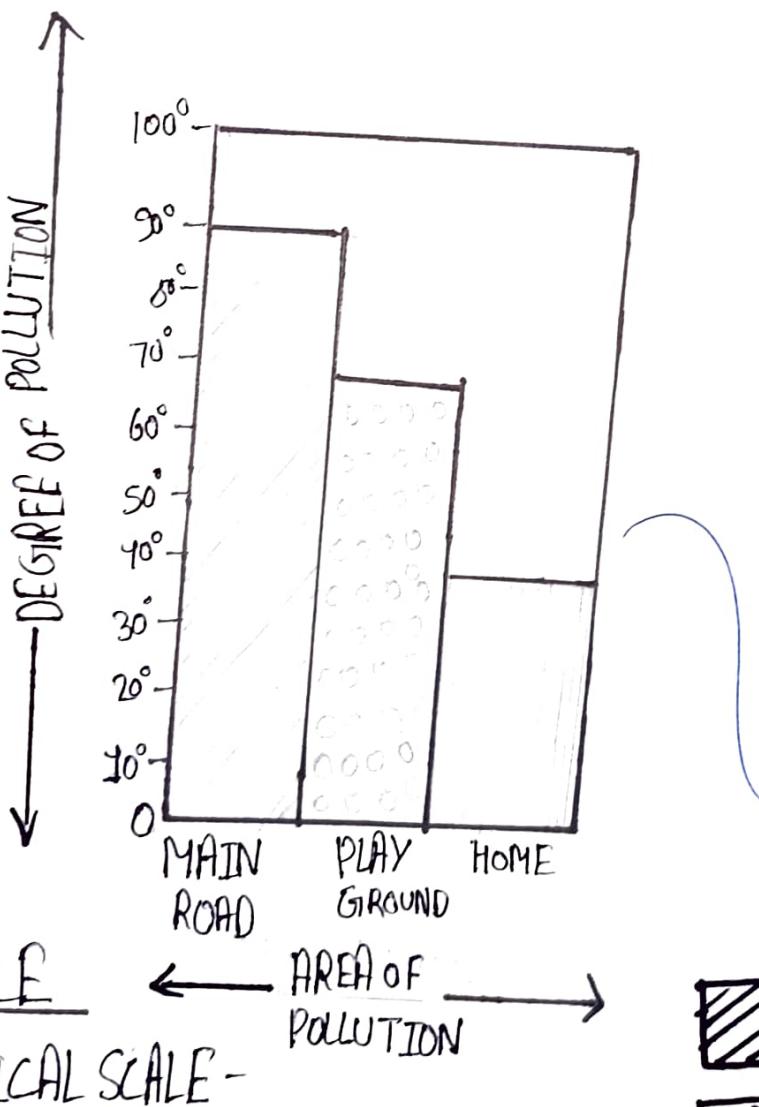

## (PURE JAMBAD COLLIERY)

AREA of AIR POLLUTION	DEGREE OF AIR POLLUTION	SCALE IN CENTIMETRES
Main Road	90°	9cm
Play Ground	58°	5.8 cm
Home	30°	3cm

# DIAGRAMMATIC REPRESENTATION OF DEGREE OF POLLUTION IN THREE DIFFERENT AREA

SHOWING THE AIR POLLUTION IN OUR LOCALITY  
(PURE JAMBAD COLLERY)

SCALE  
VERTICAL SCALE -

1 cm to  $10^{\circ}$

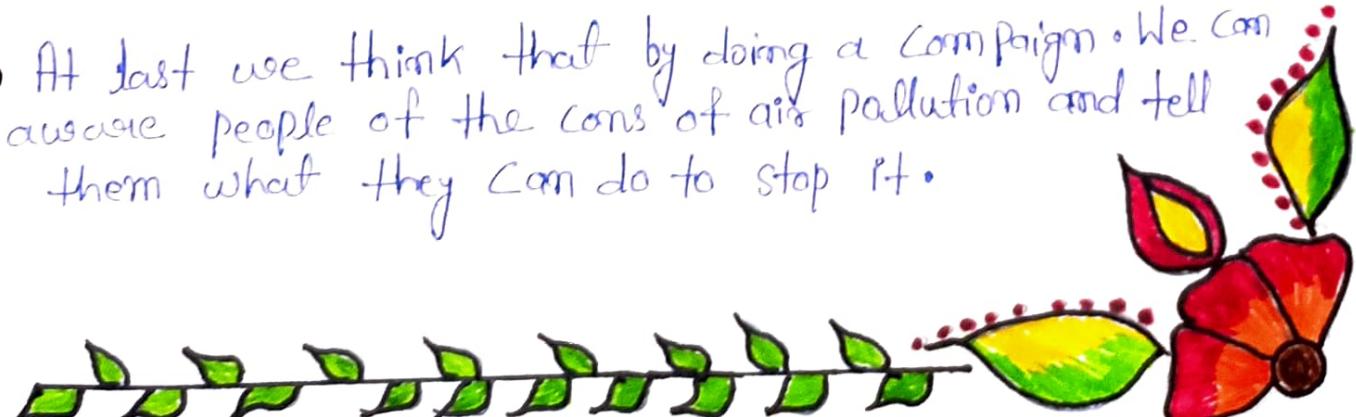

AREA OF POLLUTION

INDEX

- [Hatched square] - MAIN ROAD
- [Square with diagonal lines] - PLAY GROUND
- [Vertical lines in a square] - HOME

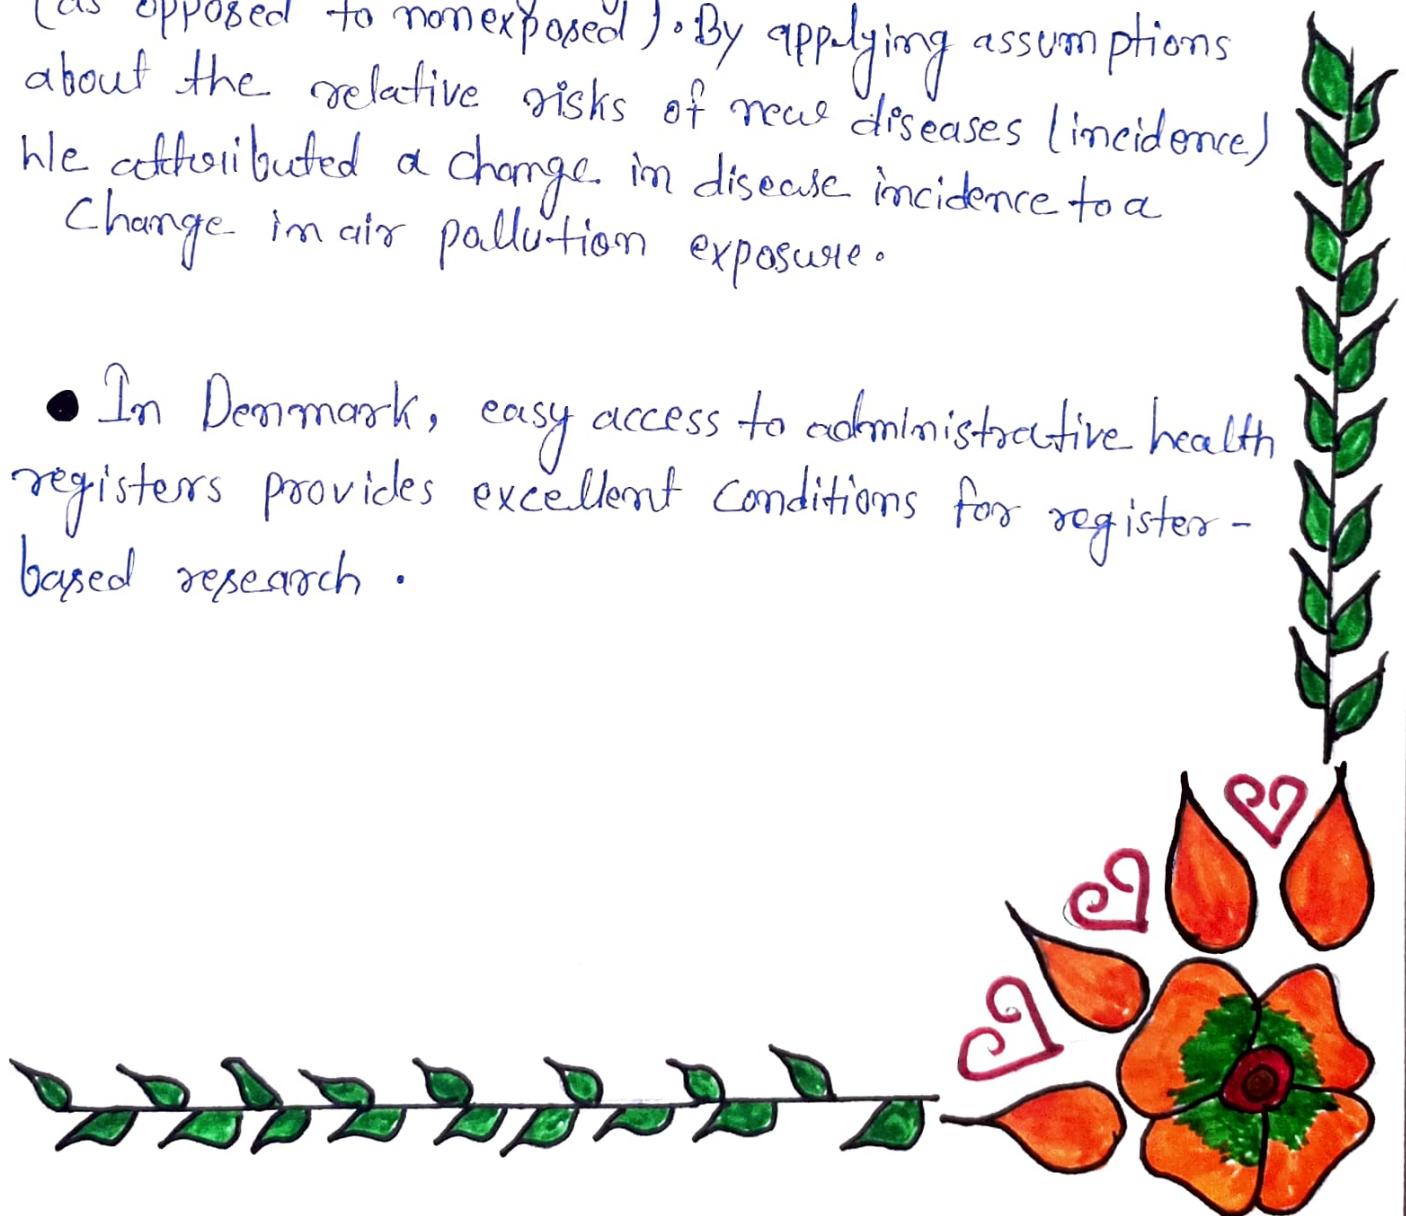

# OBJECTIVE

- Our objectives for bring this project is to express our disapproval of air pollution as it has been the biggest cause of global warming so far. Things like green house gases and car exhaust are the most common causes for air pollution.
- project and enhance the quality of air be sources and also protect public health and welfare while fostering a beneficial productive capacity.
- Prevention, Control and abatement of air pollution.
- If we do not stop air pollution, the icecaps in the north pole will eventually melt and the sea level will rise, thus flooding the low lying Countries. It will kill many animals like polar bears.
- Air Pollution is also destroying the ozone Layer and lots of animals thus we want to reduce it.
- At last we think that by doing a Campaign. We can aware people of the cons of air pollution and tell them what they can do to stop it.

# METHODS

- Since most individuals are exposed to some levels of air pollution, it is not feasible to differentiate between individuals who are exposed to certain levels of air pollution. Therefore, this study used an indirect method of identifying the "exposed" individuals (as opposed to nonexposed). By applying assumptions about the relative risks of new diseases (incidence) he attributed a change in disease incidence to a change in air pollution exposure.
- In Denmark, easy access to administrative health registers provides excellent conditions for register-based research.

# DATD INTERPRETATION

The air we breathe is full of greenery so air pollution level is not the matter of thought to us. Where air pollution is mainly found

- air —
  - i) Main roads
  - ii) play ground
  - iii) Home

- As per my survey on vehicles the pollution level of those places are as follows -

- i) Main road —  $90^\circ$  (Greatest)
  - ii) Play ground —  $58^\circ$
  - iii) Home —  $30^\circ$  (Lowest)

- The place where I live has a lot of traffic on the main road and some factories have sprung up on both sides of the main road resulting in high pollution levels on the side by green trees and the field is a bit away from the road is a bit esp. There are a number from the main road and my home is far from the main road so the level of pollution in the home is low.

# CONCLUSION. INFERENCE

- Air pollution is a major environment issue. It can affect the health and life support systems as well. Since clear air is an essential factor of life for respiration, it is necessary to prevent the sources of air pollution.
- Air pollution is often the most obvious and wide-spread type of pollution.
- Health effects of these pollution include respiratory diseases, birth defects, heart attacks, cancer, and developmental disabilities in children. Environment impacts include destruction of stratospheric ozone, poisoning of forests and waters by acid rain, and corrosion of building materials.
- We have made encouraging progress in controlling air pollution progress that has economic benefits as well as health benefits.

# AIR POLLUTION IN THE AREA OF GANGAJAL GHATI AND ITS QUALITATIVE MEASUREMENT

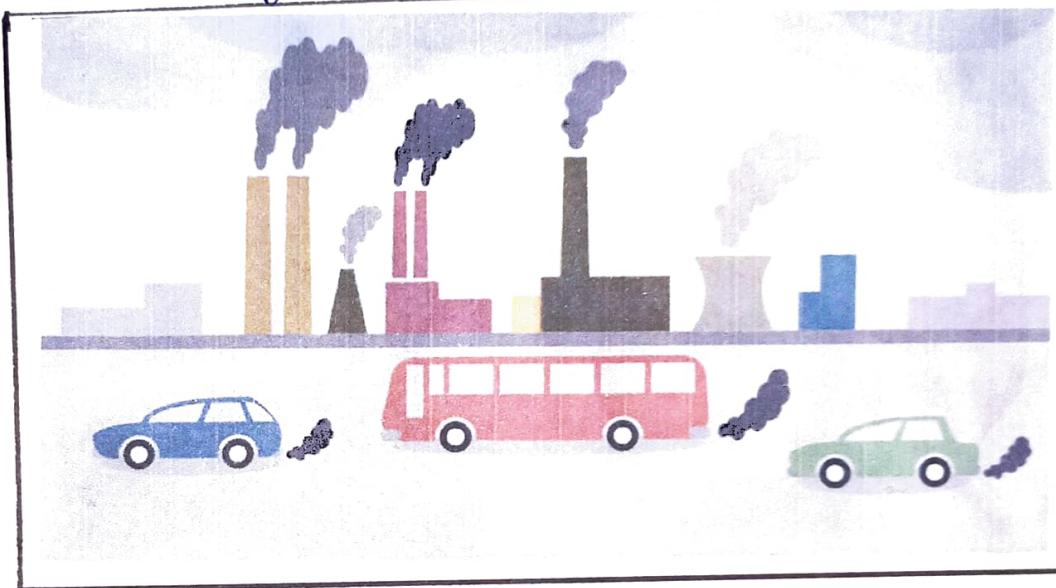

---

# CAUSES OF AIR POLLUTION

following are the important causes of air pollution:

(i) Factories and Industries: factories and industries are the main source of carbon monoxide the organic compounds hydrocarbons and chemicals. These are released into the air, degrading its quality.

## (ii) Vehicular Exhaustion:

Vehicles with engines causes air pollution. The exhaust from these contains carbon monoxide. This type of air pollution causes respiratory health problem and makes in the ozone layer which increases the exposure to the Sun's harmful rays.

## (iii) Burning of fossil fuels:

The combustion of fossils fuels emits a large amount of sulphur dioxide. Carbon monoxide released by incomplete combustion of fossil fuels also result in air pollution.

## ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude to my respected professor Buddhababu Mallick, Department of Zoology, Raniganj Girl's College, for his sincere support and co-operation in the preparation of his project on air pollution in the area of Ganganagar Grami and its Qualitative assessment in Environment studies.
