RANIGIAN WATER POLLUTION

Pg. 1

Water Pollution is the contamination of water sources by substances which make the water unusable for drinking, cooking, cleaning, swimming, and other activities. Pollutants include chemicals, trash, bacteria, and parasites. All forms of pollution eventually make their way to water.

Air pollution settles onto lakes and oceans. Land pollution can seep into an underground stream, then to a river and finally to the ocean. Thus, waste dumped in a vacant lot can eventually pollute a water supply.

Our earth has 3 parts water and 1 part land. yet our earth lacks a lot of water. There is no potable water because all the water has become polluted.

become polluted.

There is a place named Raniganj in west Bengal where water pollution is very high.

There are many companies in Raniganj from where. There is a lot of pollution from all those companies who also do water pollution.

There is a place named Punjabi Mor in Raniganj, where the drain smells very bad. The pipe there smells so bad that everyone faints.

It is very sad that we are polluting the water. The leaders of our country are also responsible for water pollution.

If we people and the leaders of our country of our country want, then we can stop water pollution if everyone together does not spread garbage and dirt carefully, then we can also save from water pollution.

There are many hospitals in Raniganj. We throw all the dirt in the hospital in the water. If we do not throw it away, then we can save water from being polluted.

But the condition of Raniganj is very bad. There is a lot of water pollution there.

If water pollution is high, then we will not have potable water left. We will suffer from diseases and may even die.

We should make people aware not to pollute water. If the water gets polluted, then a big disaster can happen. That's why we all have to save water save life.
